

AIX: How to set automatic logoff (only for terminals)

Article Number: 259 | Rating: Unrated | Last Updated: Mon, Jun 11, 2018 12:45 PM

Edit the `/etc/security/.profile` file to include an automatic logoff value for all users, as in the following example:

```
TMOUT=600 ; TIMEOUT=600 ; export readonly TMOUT TIMEOUT
```

The number 600, in this example, is in seconds, which is equal to 10 minutes. However, this method only works from the shell.
